

PLAIN SPEECH

Volume 1 – Issue 23 – 23 March 2008

“Seeing then that we have such hope, we use great plainness of speech” (2 Cor. 3:12)

By Scott Parker

STATEMENTS EVOLUTIONISTS DON'T WANT YOU TO READ

In brief, evolution is the belief that many millions of years ago life began by natural causes from nonliving matter and then gradually changed (evolved) into various types of life-forms culminating in man. This mindset is completely at odds with Scripture (**Acts 17:24-29**).

Yet, even though evolution stands opposed to the Word of God, our society is very amicable to evolutionary thought. In fact, the theory of evolution is put forth as fact in countless arenas; e.g. Hollywood's big screen, the Discovery Channel, and classrooms of public schools all throughout America. How sad.

Often times when someone challenges evolution, he/she is characterized as a “religious nut.” Well, not all people who have spoken out against evolution fit said mold. Consider the following statements which evolutionists would prefer that you do not read:

- ***“It cannot be proved by science that man descends from the ape or any other animal. The mid-link has never been found and never will be.”*** - Virchow, Anthropologist
- ***“In all this great [British] Museum there is not a particle of evidence of evolution. It is sheer nonsense, not founded on observation and unsupported by fact. This museum is full of proofs of the utter falsity of evolution.”*** - Etheridge, British Museum Fossilologist
- ***“Not one change of species into another is on record.”*** - Charles Darwin
- ***“I have always been slightly suspicious of the theory of evolution because of its ability to account for any property of living beings. I have therefore tried to see whether biological discoveries over the last thirty years or so fit in with Darwin's theory. I do not think that they do. To my mind, the theory does not stand up at all.”*** - H.S. Lipson, British physicist
- ***“We have had enough of the Darwinian fallacy.”*** - Ken Hsu, Professor: Geological Institute in Zurich
- ***“Life, even in bacteria, is too complex to have occurred by chance.”***
- Harry Rubin, Professor of Molecular Biology: University of California Berkeley
- ***“The theory of evolution suffers from grave defects, which are more and more apparent as time advances. It can no longer square with practical scientific knowledge.”*** - Albert Fleishmann, Zoologist
- ***“The pathetic thing is that we have scientists who are trying to prove evolution, which no scientist can ever prove.”*** - Dr. Robert A. Millikan, Nobel Prize winner and evolutionist
- ***“It is far beyond any reasonable doubt, that this theory [of evolution] is nothing more than physical and mathematical nonsense.”*** - Howard Holroyd, former head of the Dept. of Physics: Augustana College
- ***“Thus so far as concerns the major groups of animals, the creationists seem to have the better of the argument.”*** - Dr. Austin Clark, curator of paleontology at the Smithsonian Institute
- ***“As an anthropologist, I object to evolution. There are no data for evolution.”***
- R. Clyde McCone, Professor of Anthropology: California State University

So it is, just not the “religious nuts” are able to see the truth that evolution is false.
